**Rejuvenation The Meters Rar Files**

For further information about any Data Repository item, please contact the author. GSA Data Repository File size estimates are shown at the end of large entries. If you wish to download without launching Acrobat, right-click (option-click for Mac) on the link. Data Repository items are published exactly as the author provided them to the journal; they are not formatted or edited. The Data Repository is an archive and has limited navigation and log-in functionality. Click on the GSA logo to return to the main site.
